# SYNTEG

Innovative  
digital  
systems

---

**Synteg SA is  
an engineering  
and consulting  
company  
that operates  
in the field  
of integrated  
digital systems.**

Discover solutions for every business  
through the opportunities offered by  
innovative digital systems.

# **Synteg SA can revolutionize your company by leveraging the opportunities available in multimedia and digital systems.**

**Synteg SA is synonymous with a system integrator in the field of professional audio and video, offering consulting and design services**

Synteg SA works across several areas of the multimedia sector. Consultancy and design are offered in the world of professional audio, displays and signal distribution, as well as in the field of control systems, digital signage, and collaboration through presentation and conference systems. In addition, through automation and interactions, Synteg SA is able to create control interfaces to manage complex systems.

## **Vision**

**Synteg SA offers comprehensive consulting contracts for any need in the multimedia and system integration field, tailoring them to the client's requirements.**

Synteg SA works in close alignment with its stakeholders, and a key feature of its approach is supporting each client in order to understand their needs and challenges. Through dedicated consulting, a path is built that can guide, assist, and direct the client in developing, designing, implementing, and maintaining the adopted service and solution.

## Fields

Synteg SA is a leading company in digital solutions, capable of operating and implementing digital solutions in every sector.

Synteg SA searches for the best multimedia and digital solution suitable for each company, intervening in different industries, including:

- **Institutional and governmental Entities**
- **Corporate and healthcare**
- **Educational**
- **Retail and Associations**
- **Banking and Consulting**

## Workflow

### **Consulting and analysis of every situation are the keys and the work philosophy of Synteg SA.**

Only through in-depth analysis during the initial phases of each project can the full process to be managed be understood.

The consulting phase is essential to identify company problems by investigating their causes. Determining whether the nature of the problem is due to the absence of a system or to its malfunction is a decisive factor for speeding up every project.

Synteg SA's workflow is inspired by the phases of the SIA (Swiss Society of Engineers and Architects). The company intervenes in one or more of these phases, thanks to qualified and competent staff.

Thanks to a consulting-based approach, it is possible to tackle every project by following the phases and methods that SIA recommends and advocates in order to achieve the objectives.

## Soluzioni

Synteg SA supports companies looking for complete multimedia solutions, guiding them through the daily challenge of becoming excellence in digital innovation.

An expert team, supported by specialized partners in the multimedia field, makes it possible to combine technical brilliance with a deep understanding of business dynamics.

Synteg SA serves both small startups and large companies, with knowledge and experience in delivering tailored solutions aligned with each specific goal.
